cont

accessing the segment using the copy of the decryption key at the user location for the segment and a control process, the control process responsive to a user limitation to control distribution of the electronic information;
destroying the copy of the decryption key at the user location in response to said accessing;
rendering the decrypted segment in response to said accessing; and
destroying the decrypted segment in response to said rendering.

B
2

3. (Amended) A method of viewing encrypted electronic information on a display, comprising:

retrieving, at a user location, a segment of encrypted electronic information;
receiving, from a remote server, a decryption key for the segment;
decrypting the segment using the decryption key;
destroying, at the user location, the decryption key in response to said decrypting;
rendering the segment as decrypted; and
destroying, at the user location, the segment as decrypted in response to said rendering.
